DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18 and 27-28, drawn to an apparatus and method of configuring a local instrument, classified in class 379, subclass 88.16.
 - II. Claims 20-26, drawn to a telephone apparatus, classified in class 370, subclass 522.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as to program telecommunications features on a local instrument. Invention II is used to specify a telephone apparatus. It is clear that invention I can be used in a local instrument without using the claimed telephone apparatus as stated in invention II. The same is for invention II can be used without the feature of invention I. See MPEP § 806.05 (d).

Art Unit: 2645

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for invention I is not required for invention II, restriction for examination purposes as indicated is proper.

3. Examiner calls Mr. Scott C. Rand, the attorney on record and is informed that a written restriction would be expected.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
